

**RESOLUTION NO. 22-11**

**A RESOLUTION OF THE TOWN OF FORT MYERS BEACH, FLORIDA  
ACCEPTING THE MULTI-JURISDICTIONAL PROGRAM FOR PUBLIC  
INFORMATION DOCUMENT AS PART OF THE TOWN'S COMMUNITY  
RATING SYSTEM EFFORTS UNDER THE NATIONAL FLOOD INSURANCE  
PROGRAM; AND PROVIDING FOR AN EFFECTIVE DATE.**

**WHEREAS**, Florida Statutes provide that municipalities shall have the governmental, corporate, and proprietary powers to enable them to conduct municipal government, perform municipal functions, and render municipal service, and exercise any power for municipal purposes, except when expressly prohibited by law; and

**WHEREAS**, Article X of the Town Charter of the Town of Fort Myers Beach ("Town") empowers the Town to adopt, amend, or repeal such ordinances and resolutions as may be required for the proper governing of the Town; and

**WHEREAS**, The Town is a participant in the National Flood Insurance Program (NFIP); and

**WHEREAS**, The Town's voluntary participation in the NFIP's Community Rating System (CRS) provides property owners and residents of the Town a 25% discount on a standard NFIP flood insurance policy in the Special Flood Hazard Area; and

**WHEREAS**, The Town supports the goal of a CRS Program for Public Information to broaden public understanding of flood hazards, mapping, planning, and insurance; and

**WHEREAS**, The Town, as part of the Lee County Multijurisdictional Committee, has identified important messages to be communicated to target audiences in a Program for Public Information; and

**WHEREAS**, adoption and use of the Multi-jurisdictional Program for Public Information Document attached hereto as Exhibit "A" is in the best interest of the property owners and residents of the Town.

**NOW THEREFORE, IT IS HEREBY RESOLVED BY THE TOWN OF FORT MYERS BEACH AS FOLLOWS:**

Section 1. The above recitals are true and correct and are hereby incorporated by reference as though fully set forth herein and are hereby adopted as the legislative and administrative findings of the Town Council.

Section 2. The Multi-jurisdictional Program for Public Information Document recommended by the Program for Public Information Committee of Lee County is adopted by the Town for use by Town staff to communicate to target audiences to broaden public understanding of flood hazards, mapping, planning and insurance.

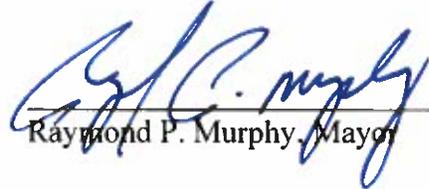

Section 3. This resolution shall take effect immediately upon its adoption by the Town Council of the Town of Fort Myers Beach.

The foregoing Resolution was adopted by the Town Council upon a motion by Council Member Allers and seconded by Council Member Veach, and upon being put to a vote, the result was as follows:

|                               |        |
|-------------------------------|--------|
| Raymond P. Murphy, Mayor      | aye    |

| Dan Allers, Council Member    | aye    |
| Jim Atterholt, Council Member | absent |
| Bill Veach, Council Member    | aye    |

ADOPTED this 21<sup>st</sup> day of March 2022 by the Town Council of the Town of Fort Myers Beach, Florida.

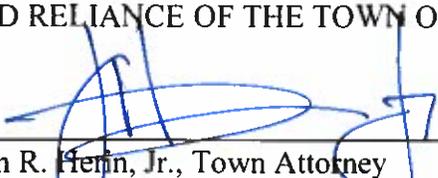

TOWN OF FORT MYERS BEACH

  
Raymond P. Murphy, Mayor

ATTEST:

  
Amy Baker, Town Clerk

APPROVED AS TO FORM AND LEGAL SUFFICIENCY FOR THE USE AND RELIANCE OF THE TOWN OF FORT MYERS BEACH SOLELY:

  
John R. Fernin, Jr., Town Attorney

This Resolution was filed in the Office of the Town Clerk on this 24 day of March, 2022.

**LEE COUNTY**  
**Multi-jurisdictional**  
**PROGRAM FOR PUBLIC INFORMATION**  
**ABOUT FLOOD HAZARDS AND FLOOD INSURANCE RATE MAPS**

**AUGUST 2020**

**A Comprehensive Outreach Strategy for:**

**Bonita Springs**  
**Cape Coral**  
**Estero**  
**Fort Myers**  
**Fort Myers Beach**  
**Unincorporated Lee County**  
**Sanibel**

Mission Statement: To protect public health and property by educating the community about flood hazards, flood insurance, proper building techniques for floodplains, and floodplain functions. An important objective of this PPI is to encourage a unified message consistent with NFIP and CRS objectives.

## PPI AT A GLANCE

- Projects implemented January through July
- Annual monitoring meeting each August
- Annual evaluation report prepared each year and submitted with annual recertification.
- PPI updated every 5 years

## Background/Timeline/Update

### ***Background***

A Program for Public Information (PPI) is a committee-based, localized approach to community outreach about flood hazards and flood insurance under the NFIP's Community Rating System (CRS) program.

In 2015, the first Multi-jurisdictional Program for Public Information was created and implemented. The original PPI document included: 1) Establishment of the PPI Committee; 2) Review of flood mapping, structure location and NFIP insurance coverage; 3) Selection of target areas and audiences; 4) Assessment of public information needs; 5) Formulation of messages and outcomes; 6) Selection of outreach projects; 7) Selection of flood response projects; and 8) Agreement on implementation, monitoring and yearly evaluation.

As mandated by the 2017 Community Rating System Manual, the community must update its Program for Public Information at least every five years. Detailed and thorough research was integrated in the original PPI document as a baseline for PPI creation. Rather than alter the intent and integrity of the original set of data and information, this PPI document has been revised to include new information with a focus on capturing and comparing data through a five-year perspective.

Annually, an addendum is created to cover membership changes or minor tweaks that will not alter the overall intent of the PPI. Those have been absorbed into this five-year update, and include changing the annual committee meeting to August and updating some language in the outreach messages to reflect our experiences during Hurricane Irma.

This five-year update discontinues the practice of tracking NFIP coverage rates for non-residential structures. Since 2015, it has become clear that the NFIP data does not allow us to easily determine the difference between a policy for a commercial structure or policies for a leased unit and/or contents within that structure. We cannot presume that all of these policies are for structures. As a result, it is difficult to determine an accurate coverage rate among either structures or units. This is also the reason that the 2015 document declined to track NFIP coverage rates for multi-family residential units. This is NOT viewed as a disadvantage. We continue to regard single-family residential coverage, which we do track, as a sentinel indicator of NFIP coverage rates.

One emerging issue, however, has presented a challenge in the 2020 update: our inability to effectively determine how many local home owners are turning to private flood insurance carriers, how that effects our overall coverage rates, and whether that is an explanation for what appears to be a decline in coverage rates for some areas of Lee County.

## UPDATE (5 year) SUMMARY

Each CRS Coordinator or Floodplain Manager from the seven Lee County jurisdictions documented their activities throughout the year and since the adoption and implementation of the original PPI in late 2015. They were polled to evaluate their success and provide feedback regarding the outreach projects. Below is the outcome of a five year evaluation:

### Observations/Trends

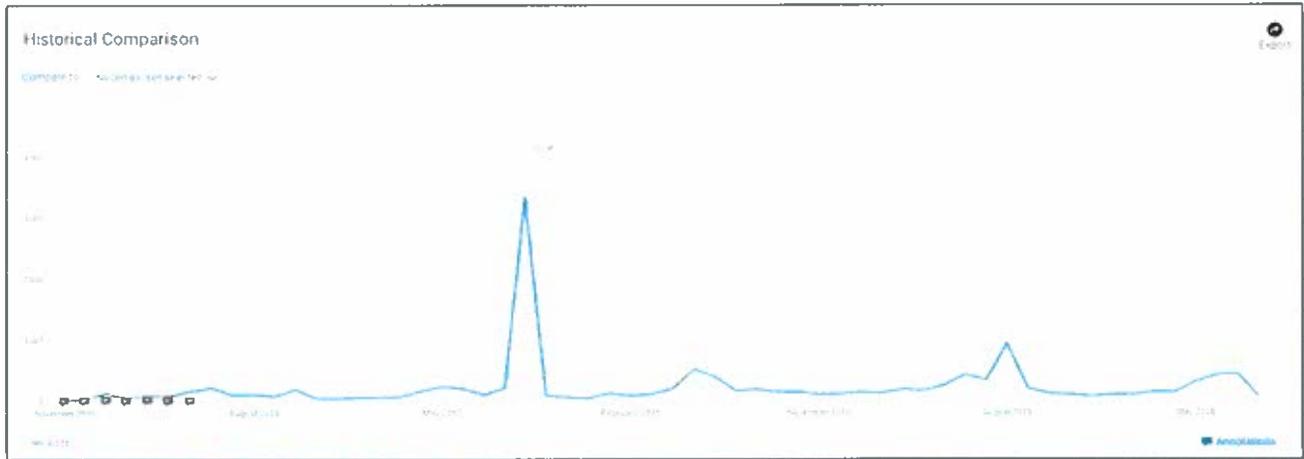

- Decrease (for several communities) for RFAs (Request For Action);
- Increased requests for FIRM information (particularly after the Agents/lenders email is sent);
- Increase in construction projects that exceed minimum standards (based on the 2017 FBC freeboard requirement);
- Increase in Mitigated Rep Loss structures due to Substantial Damage incurred due to Invest 92L Storm and Hurricane Irma (both from 2017);
- Increase (temporary) in requests for information related to the Rep Loss mailers (especially in regards to the “financial assistance” language in the letter);
- Increase in renovation projects in SFHA (with most projects remaining just under the substantial Improvement 50% threshold);
- Frustration regarding broken FEMA web links due to the recent massive website overhaul;
- Virtual media event created in response to the COVID pandemic to adapt to the current environment;
- Increase in Flood Insurance premiums and flood insurance in force. Decrease in flood insurance policies (see page 22);
- Increase in hits to online zone look up or other floodplain pages;
- Increase in flood protection information and sit visit requests;
- Increase in number of permits for flood prone area; and
- Increase in violations for unpermitted or non-compliant construction.

### Changes to PPI

Based on the observations over the last five years, below are the changes to the Program for Public Information.

- PPI committee meeting date changes to August of each year;
- Committee member replacements in addendums absorbed into updated document;
- Tweaks to outreach language regarding Elevation Certificates on record (changed to *if on record*);
- Tweaks to outreach language regarding the insuring your property (changed to *buy flood insurance*);
- Tweaks to outreach language regarding evacuation notifications (changed to *pack your go bag and pet needs*);
- Tweaks to FRP outreach 3 (changed from word document to webpage/weblinks);
- Annual rainy season project change (changed from annual rainy season briefing to annual rainy season *media event*);
- Annual media hazard change (changed from Media Hazard Guide to Media Hazard *Webpage*);
- Change PPI Event Calendar to PPI *Project Calendar*;
- CodeRed changed to AlertLee;
- LeeEvac changed to LeePrepares;
- PPI Monitoring/Reporting – over time the committee has refined the data collection method to become more simplified; and
- Lee County’s Find My Flood Zone app no longer serves addresses in the municipal jurisdictions that have their own NFIP memberships, because the County does not receive updates for all of their flood map amendments and revisions.

The chart below represents activity on the All Hazard Guide website over a five-year span. There were significant spikes in August/September of 2017 due to the summer storms (Invest92L) and Hurricane Irma. The other significant spikes may be attributed to the annual release dates of the digital hazard guide versions as well as each completed outreach.

## History

In August 1979, the City of Sanibel became the first community in Lee County to join the National Flood Insurance Program (NFIP) and adopt Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps. By 1984, all Lee County jurisdictions joined the program, which was created in 1968 to provide flood insurance to private property owners. Since then, newly incorporating jurisdictions in Lee County, an area of 521,000 acres or 813 square miles along the Gulf of Mexico in Southwest Florida, have followed this example and joined the NFIP.

When communities adopt Flood Insurance Rate Maps and flood hazard ordinances and enforce FEMA construction requirements, their residents become eligible to buy policies from the NFIP. This facilitates real estate transactions because flood insurance is required to obtain mortgages in the Special Flood Hazard Area as designated on FEMA flood maps. In addition, FEMA agrees to provide emergency disaster assistance to NFIP communities.

Beyond NFIP requirements, all jurisdictions in Lee County participate in the NFIP’s voluntary Community Rating System (CRS). Under CRS guidelines, member communities agree to adopt and enforce higher regulatory standards for construction, record keeping and public outreach. In return for these higher standards, communities earn points that translate into flood insurance discounts. In 2011, municipal and county jurisdictions in Lee, Collier and Charlotte counties formed the Southwest Florida CRS Users Group to share ideas and mutual assistance toward the goal of higher standards of floodplain management.

The original PPI document combined Unincorporated Lee County and Estero data because the Village of Estero was not an official member of the NFIP until 9/30/2015 and their independent data was not available until 2016, after the baseline data was compiled. For comparison consistency, the 2020 data includes the combined totals for Unincorporated Lee and Estero, in addition to their separate data.

## Establishing the PPI Committee

In 2013, members of the CRS Users Group in Lee County agreed to enhance their communication outreach with a Multijurisdictional Program for Public Information, a new communication option offered in the 2013 CRS Manual.

The Lee County Multijurisdictional Program for Public Information began with the creation of a PPI Committee representing public stakeholders and local government staff. An organizational meeting was held June 3, 2014 for committee volunteers representing banking, real estate, public health, insurance and general business and residential interests from all the communities. The Committee accomplished these tasks:

- Assess countywide public information needs and identify critical target audiences;
- Formulate important flood-related messages;
- Identify outreach projects to convey the messages;
- Examine other public information initiatives;
- Prepare this Program for Public Information document and have it adopted by the governing boards of member communities; and
- Implement, monitor, and evaluate the program.

Below is a current membership list as of August 2020. Details of the committee's initial membership, meeting dates, meeting notes and attendance from 2015 can be found in Appendix A. Member replacement can also be found in the PPI Addendums. Future committee member replacements will continue to be featured in addendums to the PPI as opposed to revisions to the PPI document.

## 2020 PPI Committee Approvals

The following charts of topics, target audiences, outreach projects, messages and outcomes summarize the PPI Committee's final accomplishment. An "at-a-glance" summary of all the projects by message and outcome codes is included in Appendix B Community Rating System reviewers. The remainder of this document details how this Program for Public Information addresses specific Community Rating System Activities and how these audiences, messages and projects were chosen by the committee.

|                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                  |                                                                                                                                                                                                             |

|                                               |                              | 3 – Ask your community floodplain manager about flood protection assistance.    | R4 – Increased calls for flood protection information and site visits; to be tracked by each jurisdiction                                                                                                                                  |          |                                                                                                                                                        |
|                                               |                              | 4 – Get a print or online copy of the Lee County All Hazards Guide.             | R5 – Increased distribution of the Lee County All Hazards Guide; print versions to be tracked by Lee EOC and downloads to be tracked by all jurisdictions                                                                                  |          |                                                                                                                                                        |
|                                               |                              | 5c – Before you remodel, learn about flood regulations and building codes.      | R6 – Fewer violations for unpermitted or non-compliant construction; to be tracked by each jurisdiction                                                                                                                                    |          |                                                                                                                                                        |
|                                               |                              | 6b – Report blocked ditches, swales and canals.                                 | R9 – Increased requests for action, to be tracked by each jurisdiction                                                                                                                                                                     |          |                                                                                                                                                        |
|                                               |                              | 7 – Choose your flood warning system.                                           | R10 – Increased sign-up for personal notification, to be tracked by Lee County Emergency Management                                                                                                                                        |          |                                                                                                                                                        |

## CRS activities objectives

This PPI document will assist the jurisdictions in supporting the communication objectives of the following CRS activities:

|                          |                              |                             |
|--------------------------|------------------------------|-----------------------------|
| Map Information Services | Flood Protection Information | Rep Loss Area Outreach      |
| Outreach Projects        | Flood Protection Assistance  | Drainage System Maintenance |
| Hazard Disclosure        | Insurance Promotion          | Flood Warning and Response  |

### **Map Information Services Activities**

All projects publicize how to get FEMA Flood Insurance Rate Map information. This information also can be obtained in various ways depending on the jurisdiction. Some, like Lee County, use a "Find My Flood Zone" app. Lee County's app and the widely distributed Lee County [All Hazards Guide](#) also point users to their appropriate jurisdictions and FEMA's Flood Map Service Center. Each jurisdiction has its own method of providing map information services, and all jurisdictions provide this information by phone or in person at their offices. In addition, several jurisdictions issue a written a FIRM letter if requested.

The map information includes:

- All FIRM panel information;
- Flood zone and BFE, floodway or COBRA/OPA zone;
- Coastal High Hazard Area, Coastal Building Zone, Windspeed Building Risk Category;
- Evacuation Zone;
- Watershed ID and related issues; and
- Grade elevation and issues related to the difference between grade and BFE.

### **Outreach Project Activities**

This document implements both the Program for Public information and the Flood Response Preparation package under this activity. When a storm is severe enough to activate the Lee County Emergency Operations Center, the Lee County PIO stationed at the EOC, which is also staffed by representatives of each jurisdiction, will take over countywide communication. This pre-packaged information includes select messages from the PPI. For the convenience of the Community Rating System reviewers, a table summarizes the PPI messages in the format of the "CRS Activity 330 Proposed Scoring" chart on page 6.

### **Hazard Disclosure Activities**

The PPI includes an annual email to real estate agents with messages that communicate the select CRS topics. It includes a copy of Lee County All Hazards Guide with the recommendation that they share it with their clients. That guide is loaded with information about how someone can learn the flood zone, flood map and other flood hazard details for any parcel in all of the jurisdictions. It also includes information about how their clients can contact the jurisdictions for site visits or other information. In addition, the State of Florida requires that flood zone and flood information is part of sale closing documentation.

### **Flood Protection Information Activities**

All PPI outreach projects include each jurisdiction's web site as an important conduit of information in the PPI. The jurisdictions will agree to a checklist of information to be placed on each jurisdiction's floodplain management home page. This same checklist would be offered to media and other partners. And, the jurisdictions are encouraged to embrace these website references in other outreach projects as well.

The check list would include:

- The seven committee-selected communication topics and related messages;
- Information about flood warning systems, flood hazard and evacuation maps, and links to flood safety precautions, and shelter locations, including special-needs shelters; and
- Links to:
  - Additional flood hazard and flood insurance information, especially those topics for which the jurisdiction claims CRS credit;
  - FEMA's FloodSmart website;
  - Emergency operations centers;
  - Elevation Certificate look-up; and
  - Rain gages.

### **Flood Protection Assistance Activities**

Jurisdiction staff provide one-on-one advice to anyone interested in protecting their building from flood damage. Some of these can be inexpensive, such as retrofitting an elevated foundation with the proper flood openings. Some can be expensive, such as elevating a slab-on-grade structure. Therefore the assistance includes a discussion of possible financial assistance and all relevant regulatory requirements. Some instances may include a site visit to determine the source of flood damage and to review alternative protection measures. These may be followed by a written summary of the flood problem and recommended alternatives. The reviews will include how elevating a building, retrofitting flood openings, and having the proper enclosed areas can reduce flood insurance premiums.

The committee discussed this service and made two recommendations:

First, in the past, the public has been advised of this service through an annual mailing to all properties in the community or all properties in the SFHA. This has proven to be very expensive and publicizes the service to many people who do not need it. The committee agreed that the real target would be those most likely to experience flooding and benefit from this assistance – their repetitive loss areas.

The communities originally mapped their repetitive loss areas using NFIP data, local data, and statistics, initially focusing on structures that had received at least one or more flood insurance claim to the NFIP. Then, dates of the claims were compared to the dates of known weather events to determine the potential causes of flooding. Topographic data was used to identify areas with significantly lower elevations than the developed areas with no flood claims. Two-foot (spaced) contours and a LiDAR DEM were used as a background to help with visualization of topography. The process also looked at the areas that are most vulnerable to storm surge along the coast and shoreline, populated areas along interior waterways, areas that the communities have had detailed studies due to flooding and/or local knowledge of problematic flooding. The result of mapping the many layers of information is that the communities were able to better determine the areas and specific structures that may be subject to flooding.

While an annual notice to repetitive loss area properties will be the primary publicity vehicle for the service, it was decided that the assistance should also be included in other media that reach a wider audience, such as on each community's website, the All Hazards Guide, and notices to lenders, real estate agents, and insurance agents.

Second, the committee recommended that appropriate PPI messages be conveyed to people receiving the assistance along with the recommendations from the visit. For example, these messages could be reinforced:

- Buy flood insurance for your home and contents or keep a flood insurance policy (Message 2);
- Protect your family, too. Get a print or online copy of the Lee County All Hazards Guide (Message 4); and/or
- Learn about the building regulations and get a permit before you start (Messages 5c and 5a).

#### **Insurance Promotion Activities**

This PPI document includes communication that supports the goal of increasing flood insurance coverage. A lender sits on the PPI Committee. The PPI includes the assessment of NFIP coverage for the number of policies in each jurisdiction in the AE and VE flood zones, and the number of policies covering residential and non-residential structures. An outcome for all six outreach projects is to increase the number of NFIP flood insurance policies in the jurisdictions. An elected official in each jurisdiction will send the letter to Repetitive Loss Area property owners and residents. This document establishes 2015 baseline coverage rates for single family residences and non-residential structures in each jurisdiction and sets the 2015 baseline number of policies for single-family homes, residential 2-4 units, other residential units, and non-residential structures.

#### **Rep Loss Area Outreach Activities**

The PPI identifies repetitive loss areas as a target area and includes two outreach projects to separate target audiences: residents and non-resident owners of houses in repetitive loss areas. It also verifies that the outreach messages promote flood insurance, flood protection assistance and warning systems and response.

#### **Drainage System Maintenance Activities**

Florida's Stream Dumping Regulations make dumping or obstructing flows in ditches and streams illegal. In this PPI, Outreach Projects 2 and 4 will bring the message "Don't block natural flowways," to all permit applicants and non-resident owners of properties in repetitive loss areas. The message "Report blocked ditches, swales and canals," is delivered in Outreach Projects 1, 3, 5 and 6. The projects will outline the benefits of these messages, including reduction of neighborhood flooding. It will also include the consequences violating the Florida Statute.

#### **Flood Warning and Response Activities**

Traditionally, the public is advised of this service through an annual mailing to all properties in the community or all properties in the SFHA. The committee favors an alternative approach for four reasons:

1. Government mailers are more likely to be tossed as junk mail than to actually be read and saved.
2. The expense of a multijurisdictional mailing to 119,424 structures is estimated to be approximately \$47,770. This is based on a cost of \$.40 per mailer including stationery and bulk mail rates. Due to the committee's desire to communicate several messages, it was decided that this communication would not be appropriate for a mailed postcard or a utility bill stuffer. Also note that no single utility company covers the entire jurisdiction. Not all of the jurisdictions have an existing mailer that can "piggy-back" for this mailing.
3. The most compelling reason the committee embraced the alternative is that many outreach projects already exist in the multijurisdictional area to communicate about flood warning systems and response as well as flood hazard and safety messages. These saturate the Southwest Florida area throughout the June 1-October 31 storm season. Led by the Lee County Emergency Operations staff, all jurisdictions participate in hurricane preparedness outreach. The Lee County EOC distributes approximately 25,000 printed All Hazards Guides throughout the county. This guide includes an abundance of information about both criteria for 610 – notice of the warning system and recommended safety measures for a flood. Its hurricane preparedness seminars reach more than 3,500 people annually. In addition, all jurisdictions have newsletters and/or web sites that explain flood warning systems and hazards and promote safety information. Beyond that, stakeholder groups participate in hurricane season communication – all of which highlights flood warning and response information coupled with messages about flood hazard risks and safety measures. These include:
  - Four major newspapers with a combined circulation of more than 200,000: The News-Press, Naples Daily News, Florida Weekly – Fort Myers, and Breeze Newspapers – which has five community newspapers, all publish annual hurricane guides for both print and online distribution during June. In addition, these newspapers repeat this information often during hurricane season as part of their coverage of tropical storms, storm anniversaries and rainy season events.
  - NBC, CBS, ABC and Fox local television broadcast affiliates reach all of Southwest Florida with routine storm warning, response and hazard safety information. Each also posts an online Hurricane Guide and routinely references warning and response information and flood safety information as part of coverage of tropical storms, storm anniversaries and rainy season events.
  - WGPU, the Public Radio station affiliated with Florida Gulf Coast University and a communication partner with the Lee County Emergency Operations Center, and all major radio stations similarly broadcast this information.
  - The Lee County Electric Coop includes this information in its billing at least once annually – often more frequently in stormy seasons.
  - All local Publix and Home Depot stores distribute this information, and Home Depot holds several preparedness seminars at its stores during June.
  - In jurisdictions where Publix and Home Depot do not exist, smaller chains or private grocery and hardware stores fill this role.
  - The Lee County Public Information Officer conducted a survey of all major distributors of hurricane season guides and analyzed the content. Her survey found at least a dozen additional hurricane season outreach projects that re-distribute the flood warning and response and hazard safety information distributed by the Lee County Emergency Operations Center.
  - This information is posted in all libraries throughout Lee County.

4. The final reason the committee prefers the alternative outreach is that the news media is now the primary source of storm, weather and impending disaster information. However, every reporter, editor, anchor, blogger, etc. is communicating something different. An important objective of this PPI is to encourage a unified message consistent with NFIP and CRS objectives. That consistency will be extended to communication to insurance agents, real estate agents, lenders, residents of repetitive loss areas and non-resident owners of property in the repetitive loss areas. A clear and consistent message will be distributed in the way it is most likely to be received. Specifically, the flood warning system information will be communicated through the message: Choose your flood warning system. The committee is encouraging individuals not simply to turn on the TV or radio to learn if a storm is coming, but to **CHOOSE** a method of personal notification. In this jurisdiction, those options include:

- **AlertLee** – A free telephone, text or email service;
- **LeePrepares for iPhone** – A free app for Apple devices that pushes evacuation notifications in real time during emergencies and which also allows users to search for evacuation zones by street address;
- **LeePrepares for Android** – A free app for Android devices that pushes evacuation notifications in real time during emergencies and which also allows users to search for evacuation zones by street address or by GPS;
- **Facebook** – This Facebook page posts real time updates about emergency conditions and always offers general preparedness information;
- **Twitter** – There are two Twitter accounts: [@LeeEOC](#) - offers purely emergency information, and [@LCEMFL](#) - offers also includes general and preparedness information;
- **IPAWS** – Lee County Public Safety is a FEMA Integrated Public Alert Warning System (IPAWS) Alerting Authority. We can utilize the IPAWS to alert and warn Lee County residents and visitors about serious emergencies through various means, including the Emergency Alert System (EAS), Wireless Emergency Alerts (WEA), and the National Oceanic and Atmospheric Administration (NOAA) Weather Radio.

## Review of Mapping, Structure Location and Insurance Coverage

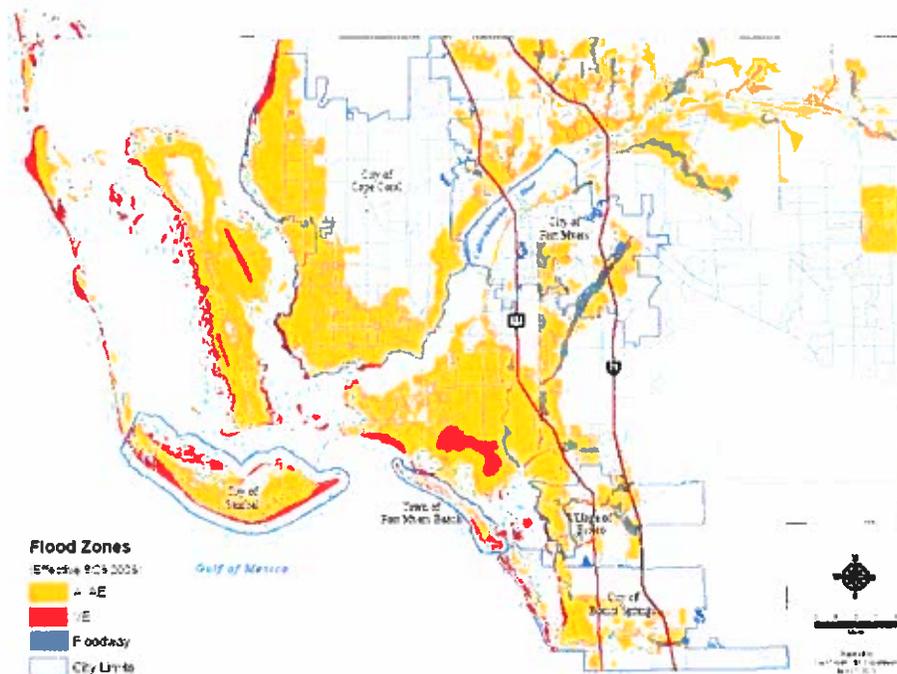

The committee crafts its public information program with a review of countywide FEMA Flood Insurance Rate Maps, the Lee County Hurricane Evacuation Map, which was adopted as part of Lee County's Local Mitigation Strategy, and consideration of areas where the National Flood Insurance Program reported repetitive losses.

The committee specifically considers VE Zones, A and AE zones; regulatory floodways in the AE zones; X Zones outside the Special Flood Hazard Area; and repetitive loss areas in each of the communities.

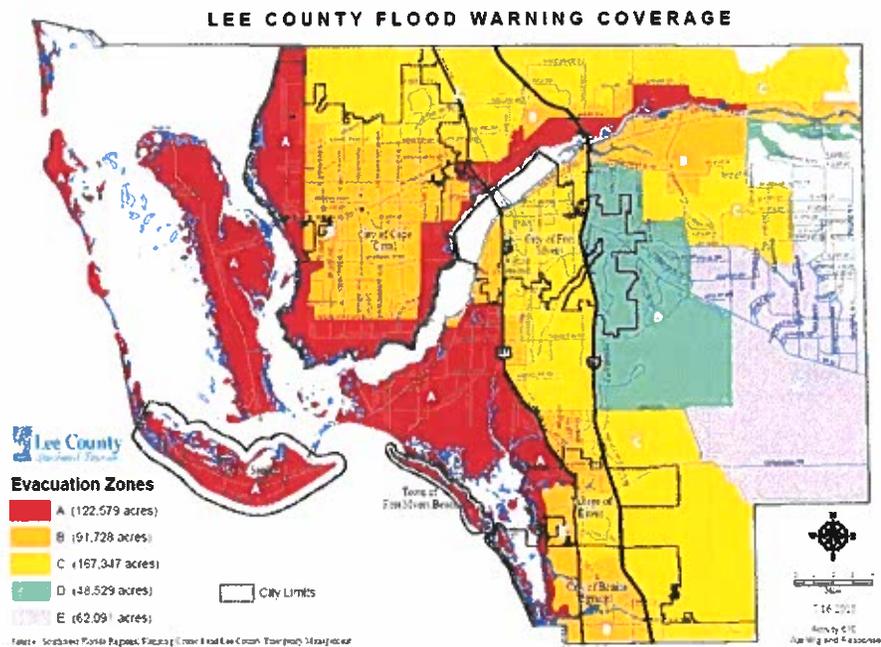

The Flood Insurance Rate Maps show that most of Lee County's communities include a mix of FEMA flood zones, with two exceptions:

- The barrier islands of Fort Myers Beach and Sanibel are mapped almost completely in the Special Flood Hazard Area and have no significant areas of X Zone;
- Because they are barrier islands and FEMA has mapped them exclusively with coastal modeling, neither Sanibel nor Fort Myers Beach has regulatory riverine floodways.

### Lee County Flood Zones and Regulatory Floodways established by FEMA

In reviewing the Lee County Hurricane Evacuation Map from 2015, the committee noted that all V Zones from the FEMA Flood Insurance Rate Maps are included in Evacuation Zone A. The same holds true for the most updated version of this evacuation map in 2020.

**Acres in Flood Zone – 2015 Baseline**

Descriptions of the flood zones, Evacuation Zone A and repetitive loss areas can be summarized in this table, which reflects **zones in acres and repetitive loss properties in numbers of structures as of 2015:**

|                                       | FLOOD INSURANCE RATE MAPS |          |                     |         | EVACUATION MAP    | NFIP Data           |
|---------------------------------------|---------------------------|----------|---------------------|---------|-------------------|---------------------|
|                                       | V Zone                    | A and AE | Regulatory Floodway | X Zone  | Evacuation Zone A | Rep Loss Properties |
| <b>Bonita Springs</b>                 | 792                       | 8,338    | 501                 | 16,784  | 3,391             | 62                  |
| <b>Cape Coral</b>                     | 1,269                     | 32,431   | 28                  | 40,218  | 25,262            | 2                   |
| <b>Estero</b>                         | 115                       | 6,280    | 1,194               | 9,985   | 2,695             | 1                   |
| <b>Fort Myers</b>                     | 36                        | 6,976    | 901                 | 19,003  | 18                | 5                   |
| <b>Fort Myers Beach</b>               | 645                       | 1,017    | 0                   | 0       | 1,661             | 326                 |
| <b>Lee County</b>                     | 9,680                     | 105,271  | 8,413               | 251,076 | 78,925            | 197                 |
| <b>Sanibel</b>                        | 2,727                     | 8,015    | 0                   | 4       | 10,745            | 61                  |
| <b>Total Multijurisdictional Area</b> | 15,264                    | 168,328  | 9,843               | 337,070 | 122,697           | 654                 |

**Structures in Flood Zones – 2015 Baseline**

In addition to looking at the flood zones and other flood hazard features, the committee considered the number of structures located within the Special Flood Hazard Area in the V, AE and A zones, and outside the Special Flood Hazard Area in the X Zone.

Residential structures consistently comprise at least 90% of the SFHA structures in each community, with the exception of Fort Myers, where it is 88%.

Information gleaned from this review can be summarized in the following two tables:

| <b>Structure Count in The Special Flood Hazard Area</b> |                 |                             |                            |                            |
|---------------------------------------------------------|-----------------|-----------------------------|----------------------------|----------------------------|
| <b>Jurisdiction</b>                                     | <b>Land Use</b> | <b>Number of Structures</b> | <b>Total of Structures</b> | <b>Percentage of Total</b> |

*Determine Level of Flood Insurance Coverage*

The committee was interested in looking at coverage rates by category of structure within the SFHA, particularly for single-family homes. However, the shared CIS (Community Information System) data does not enable us to give a coverage rate for a particular kind of structure, such as single-family or multi-family, specifically within the SFHA. Therefore, coverage rates by type of structure can only be provided for the combined area inside and outside of the SFHA.

The islands of Sanibel and Fort Myers Beach provide an exception for the specific category of single family residences, because every SFR structure – with the exception of one single-family house on Sanibel – is in the SFHA.

A similar conundrum appears with the analysis of the multi-family categories. The number of 2-4 family policies exceeds the number of structures in that category. In the all-other residential category, coverage rates appear to be close to 100% (or over 100%) only because the number of policies for dwelling units is disproportionate to the number of multi-unit structures. Therefore coverage rates cannot be accurately calculated for any category that includes multi-family structures. This would include any “total” comparisons adding in the number of policies attributed to multi-family dwellings. Those coverage rates will be artificially high. To determine an accurate multi-family coverage rate, the jurisdictions would have to determine how many multi-family dwelling units are in each jurisdiction, and the NFIP would have to break out the policies for multi-family structures from the policies for multi-family units, many of which may be for contents only.

Therefore, the committee used the NFIP data to establish two important baselines:

1. The number of flood policies in each jurisdiction by residential and non-residential structure categories;
2. Jurisdiction-wide coverage rates for single-family residences and non-residential structures.

*Recommendations Related to the PPI Document and Insurance Coverage Outcomes*

The committee acknowledged that the single-family coverage rates based on this analysis may appear artificially low for the jurisdictions with large areas outside the SFHA, especially Bonita Springs, Cape Coral and unincorporated Lee County. The committee recognizes the challenge in improving these coverage rates, especially considering the rising cost of flood insurance premiums and the high number of structures outside the SFHA, which are not mandated to have insurance. Another factor at play may be the high number of retired homeowners who do not have mortgages.

All of these factors contribute to the wide variation in single-family coverage rates among the jurisdictions. The committee wrestled with the question: Is the current NFIP coverage adequate? The committee feels it is not, but did not feel it was useful to assign some percentage or number-driven goal to the promotion of NFIP policies.

Therefore, the committee took a two-step approach to encouraging increased NFIP coverage throughout the multijurisdictional area:

1. Track the residential and non-residential coverage rates in each jurisdiction and the numbers of policies in the flood zones and among the residential and non-residential structures against the 2015 baselines established in this report.
2. The PPI document would be used to outline an information program to increase the NFIP protection for property.

This PPI document addresses the topic Buy Flood Insurance with this message, "Buy flood insurance for your home and contents." This outreach is explored fully throughout this PPI document, and can be summarized here:

| <b>Message: Buy flood insurance for your home and contents</b>  |                                              |

In addition to the structure and policy numbers included in this report, the Lee County Multijurisdictional PPI tracked NFIP coverage rates for single-family residences and for commercial structures.

This five-year update discontinues the practice of tracking NFIP coverage rates for commercial (non-residential) structures. Since 2015, it has become clear that the NFIP data does not allow us to easily determine the difference between a policy for a commercial structure or policies for a leased unit and/or contents within that structure. We cannot presume that all of these policies are for structures. As a result, it is difficult to determine an accurate coverage rate among either structures or units. This is also the reason that the 2015 document declined to track NFIP coverage rates for multi-family residential units. This is NOT viewed as a disadvantage. We continue to regard single-family residential coverage, which we do track, as a sentinel indicator of NFIP coverage rates.

At a glance, the above trend chart appears to show a reduction in policies in force for the NFIP coverage rate for commercial structures in Cape Coral, Fort Myers and the outdated 2015 category for Lee County/Estero. In addition, the trend chart for NFIP coverage rates – which reflects newly constructed structures from 2015 to 2022 – shows a drop in the NFIP coverage rate for single-family homes for Cape Coral, Sanibel and the outdated comparison category of Lee County/Estero. This is particularly interesting in Cape Coral, where the number of residential policies in force increased by 1,161 or 3.6% but the coverage rate – figuring in new construction – declined by a slim 1 percentage point.

Looking more in-depth into these trends, the committee concluded that its messaging to promote the purchase of NFIP policies continues to be successful. We lack conclusive data to verify these trends, which can also be influenced by NFIP policy and economic conditions beyond our control.

**These are the main considerations for a statistical decline:**

- 1. Increase in private flood insurance policies: Over the last five years, the number of private flood insurance options available here has skyrocketed, but we do not have access to reliable data regarding how many policy holders are substituting private coverage for NFIP policies. Anecdotally, local insurance agents, including the two who serve on our committee, acknowledge that this is a significant trend. Private insurance options include broader coverage, lower premiums and/or deductibles, faster waiting periods, and easier underwriting (no EC). There are also higher payout caps, which tends to attract owners of high-value properties – like those on Sanibel Island – where home values far exceed the \$250,000 maximum payoff on an NFIP policy. It may seem more advantageous for homeowners to obtain *one* robust private policy – especially for VE zone structures – than to couple an NFIP and private policy, which had been a common practice in the past.**
- 2. LOMCs – There has been an uptick in the Letters of Map Change which remove buildings or properties from the SFHA, therefore the federal mandate to carry flood insurance is typically removed.**
- 3. Pre-FIRM, Non-Primary structures – Lee County has a substantial number of Pre-FIRM structures, many of which are seasonal residences, rented to others, or commercial properties. The Homeowner Flood Insurance Affordability Act (HFIAA) mandated 25% annual premium increases on these structures. Compounded, premiums for these properties have tripled since HFIAA became law. As a result, many of these property owners have moved to private insurers offering equal or better coverage at lower premiums or could no longer afford coverage and now self-insure.**
- 4. The NFIP allows for dropped coverage if there is no mortgage – and cash purchases continue to be popular here.**

**The committee will continue its practice of updating statistics annually so that the new categories reflected in the trend chart will begin to reveal trends in Lee County and Estero that are more suited to annual comparisons.**

## Target Areas and Audiences

With the review of maps and insurance policy data, the committee turned its attention to target areas and audiences.

Because Lee County communities have been members of the NFIP since the early 1980s, much of the construction here complies with NFIP standards. And, because the Florida Building Code has long addressed hurricane and other flood-related issues. The exception could be Fort Myers Beach, which is a barrier island with pre-FIRM development and the greatest concentration of repetitive loss properties. However, the committee felt that the messages targeted to Fort Myers Beach would also be needed throughout the Special Flood Hazard Area.

The other exception is the repetitive loss properties themselves, and by extension, the neighborhoods around those properties. The committee saw the residents of rep loss structures as a separate audience from the owners of these structures. This is particularly the case Southwest Florida where there are many seasonal residents and rentals.

The committee also agreed that construction permit applicants should be a target audience to encourage exceeding minimum requirements and to be aware of substantial improvement/substantial damage regulations in the SFHA. However, because they felt that building responsibly in areas outside the Special Flood Hazard Area is also important, they broadened this audience to all construction permit applicants with the goal of informing them about the safety and insurance benefits of exceeding minimum construction standards.

In addition, the committee identified two other target audiences, which are not only stakeholders who will benefit from the communication goals of the PPI and but also will pass that information to additional audiences. The media was selected not only because most people turn to news coverage to hear weather and storm reports, but also because they do not usually report a message consistent with NFIP and CRS objectives. Real estate and insurance agents and lenders, who deal routinely with NFIP issues, were also identified as a direct conduit to their clients. They can especially be useful to spread the word about flood map and flood protection services.

Therefore, the committee finalized its TARGET AUDIENCE as:

- Residents and non-resident property owners within repetitive loss areas;
- Permit applicants;
- Real estate and insurance agents and lenders;
- The media.

The PPI Committee discussed that the media in the Lee County jurisdictions are both a target audience and an important source of communication outreach.

## Assessment of Public Information Needs

Assessment of current outreach efforts to the target areas and target audiences are done annually. It includes an inventory of existing outreach efforts, not only about flood insurance and floodplain management issues, but also about hurricanes and related topics. The original inventory was Jan. 1, 2013 through October 1, 2015. Subsequent reviews note a strong trend toward digital communication.

The Lee County Public Information Officer conducted a thorough assessment of media coverage particularly to prepare for the 2015 hurricane season. This began with a collection of all hurricane guides or related special outreach projects done in 2014. The content was reviewed for common messages. As a second step, the PIO contacted all major media outlets and asked specific questions about their needs and interests for future coverage. This discussion included the most useful file types for maps (vector files not jpg) and text (word processing documents rather than pdf) and how they prefer to receive information (electronic not print). The PIO determined that local media are willing and even eager to have additional information about hurricane and flood hazards in a ready-to-use format.

In the spring of 2015, the Lee County PIO conducted the first coordinated media outreach. It included:

- The Lee County All Hazards Guide expanded to include additional flood hazard messages converted to AP Style and burned to a disk,
- A special landing page on the Lee County Emergency Management website for the Hurricane Guide media kit so those without the disk could access the files and info.
- Tracked the hurricane guides and messaging as they came out in 2015.

In addition to reviewing communication by the media, the committee also looked at everything the jurisdictions distribute and post in libraries.

Private sector communication was also surveyed. Although there was a variety, the Committee specifically examined these, which reached a large number of people:

**News media**, including The News-Press, Naples Daily News, Breeze Newspapers, NBC-2, ABC-7, WINK (CBS), WINK Radio, Fox-4, WGCU (PBS)

- The media distributes weather, warning system, evacuation and emergency response information as needed as storms approach, during and after.
- Both major newspapers and the Breeze family of local newspapers and all four of the major broadcasters posted hurricane guides that include information about warning systems, preparation for storms, and storm safety.
- WINK produces an additional print version of the guide which it distributes.
- All media does news coverage on the anniversary of major storms. Since the last CRS site visit, this has included anniversary information about Hurricanes Charley and Wilma.
- All news media is included in news releases distributed by the Lee County PIO when the Lee County Emergency Operations Center is activated.

**Home Depot and local hardware stores**

- During hurricane season, Home Depot distributes hurricane preparation information that includes local warning systems and tips on preparation for storms and storm safety.
- Also during hurricane season, Home Depot stores hold presentations and workshops about storm safety.
- Both the print and presentation information covers advice in property protections and building standards.

- In small communities, like Sanibel Island and Fort Myers Beach, which do not have a Home Depot specifically, local hardware or drug stores distribute similar information.

#### **Lee County Electric Cooperative (LCEC)**

- At least once a year and more frequently in a busy storm season, the electric company billing includes information on local warning systems, preparation for storms, and storm safety.
- This billing stuffer is usually timed for hurricane season.

#### **Libraries**

- The Town of Fort Myers Beach Library and Lee County library system, which serves all the other jurisdictions, is a repository for all flood hazard and flood map information. Lee County's All Hazards Guide is also available.
- Information in the libraries covers local warning systems, preparation for storms, and storm safety.

#### **Publix Grocery Stores**

- Annually Publix distributes a hurricane guide that includes information about warning systems, preparation for storms, and storm safety. It is often the WINK guide.
- In small communities, like Sanibel Island and Fort Myers Beach, which do not have a Publix specifically, local stores distribute similar information.

#### **Red Cross**

- The Red Cross distributes warning system, evacuation and emergency response information as needed during storms.
- The Red Cross is also a distributor of 1,300 copies of the Lee County All Hazards Guide.

The committee made this over-arching conclusion: Only the jurisdictions are communicating information truly consistent with CRS and NFIP objectives. All other outreach saturates the community with information about flood warning and response information, emergency safety tips and general preparedness consistent with Activity 610. Despite this abundant (even redundant) communication, the coverage tended to encourage the community to watch their news outlet for breaking information. There was little encouragement to sign up for personal alert systems coming directly from the Lee County Emergency Operations Center. The media was seen not only as an under-utilized partner, but also as a potential distraction from CRS/NFIP messages.

The committee agreed outreach to the media could counteract this and reinforce unified messages. As a member of the PPI Committee, the Lee County PIO proposed two specific outreach projects to the media as a target group to improve this effort: a media event and a specific Hazards Guide for the media.

The inventory discovered these additional important "gaps" in communication:

- Most communication related to flood insurance and floodplain management is distributed by local governments. However, not all jurisdictions were communicating the same messages in a consistent, action-oriented way.
- Lee County's Public Safety Department produces an All Hazards Guide, but it lacks input from local floodplain managers and does not support CRS messages. The committee recommended that the All Hazards Guide content be expanded to include consistent messages.
- Traditional print or broadcast outreach by the jurisdictions and the media is being supplemented by electronic communication, especially web sites. But the sites themselves are not an effective outreach because they have no consistent messages. The committee agreed that all jurisdictions should post key links (as outlined in the discussion of Flood Protection Information) and should encourage the media and others to post these links as well.

The following chart summarizes this assessment process.

| Outreach Projects/Messages                                                                                                    | Bonita Springs                                                                                                                                   | Cape Coral  | Fort Myers    | Fort Myers Beach | Lee County/Es tero | Sanibel     | Other                                                    |

## Formulate Messages and Outcomes

The Committee reviewed the recommended CRS outreach topics and chose seven. Specific, action-oriented messages were selected for each topic, which are labeled by the CRS topic number in the summary table.

Effective communication will result in measureable outcomes, which are labeled in the following summary table as R for “results.” Of course, it is presumed that a variety of other factors, including the rising cost of flood insurance, a relatively active or inactive hurricane season, a relatively dry or rainy summer season, could also affect the outcomes. Therefore, they are viewed as indicators, and not an exact measure of the success of these campaigns. These outcomes will be tracked as explained in the summary table and will be reported at an annual committee meeting. That meeting will be more fully explained in the Implementation, Monitoring and Evaluation section of this document.

Most of these messages are self-explanatory, but several bear additional comment.

“Choose your flood warning system” was specifically crafted to encourage all residents and audiences to take individual action to sign up for personal warning notification. This fulfills the “warning system” portion of 610, and therefore is a message in every outreach project.

“Get a print or online copy of the Lee County All Hazards Guide” was finally chosen after the committee considered a variety of flood safety messages like “Turn around Don’t Drown,” and “Obey Evacuation Notices.” Because these messages mimic the tips and preparedness information already in the Lee County All Hazards Guide, which also includes the flood warning system information, the committee agreed that the most important task is to urge people to get a copy of the guide for complete information. This is a primary message in all six outreach projects, including those which encourage the media, real estate and insurance agents, and lenders to emphasize the messages in the guide, to post the guide on their websites and to pass along the links to their customers.

The Build Responsibly and Protect Natural Floodplain Functions topics include alternative messages to accommodate different target audiences.

The Build Responsibly message 5a, “Get a permit before you build,” is targeted to media for widespread redistribution. 5b “Know the safety and insurance benefits of exceeding minimum standards” is aimed at permit applicants, real estate and insurance agents, and lenders. 5c “Before you remodel, learn about flood regulations and building codes” is aimed at both residents and non-resident owners in rep loss areas.

6a “Don’t block natural flowways,” is used in the outreach to permit applicants. The companion to this message, 6b “Report blocked ditches, swales and canals” was considered important enough to include in all of the other five outreach projects. Flat terrain and porous, sandy soil encourage standing water in this multijurisdictional area. One of the most useful tasks for residents is to let the jurisdictions know if there is a blockage so it can be cleared to improve drainage capacity before a serious storm event.

## Outreach Project Results Summary Table

| <b>All Messages and Results/Outcomes</b>       |                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                         |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Topic</b>                                   | <b>Messages</b>                                                                                                                                                                                          | <b>Results/Outcomes (R)</b>                                                                                                                                                                                                                                                                                                             |
| <b>1. Know Your Flood Hazard</b>               | 1 – Learn your flood hazard, zone and map information and your evacuation zone.                                                                                                                          | R1 – Increased requests for FIRM information from the jurisdictions – to be tracked by each jurisdiction<br><br>R2 – Increased hits to online zone look-ups and other floodplain management web pages, to be tracked by each jurisdiction                                                                                               |
| <b>2. Buy Flood Insurance</b>                  | 2 – Buy flood insurance for your home and contents.                                                                                                                                                      | R3 – Increase in the number of flood insurance policies, to be tracked by each jurisdiction                                                                                                                                                                                                                                             |
| <b>3. Protect Property from Flood Hazard</b>   | 4 – Get a print or online copy of the Lee County All Hazards Guide.                                                                                                                                      | R5 – Increased distribution of the Lee County All Hazards Guide; print versions to be tracked by Lee EOC and downloads to be tracked by all jurisdictions                                                                                                                                                                               |
| <b>4. Protect People from Flood Hazard</b>     | 3 – Ask your community floodplain manager about flood protection assistance.                                                                                                                             | R4 – Increased calls for flood protection information and site visits; to be tracked by the jurisdictions                                                                                                                                                                                                                               |
| <b>5. Build Responsibly</b>                    | 5a – Get a permit before you build.<br><br>5b – Know the safety and insurance benefits of exceeding minimum standards.<br><br>5c – Before you remodel, learn about flood regulations and building codes. | R6 – Fewer violations for unpermitted or non-compliant construction; to be tracked by each jurisdiction<br><br>R7 – Increase in construction projects that exceed minimum standards; to be tracked by each jurisdiction<br><br>R6 – Fewer violations for unpermitted or non-compliant construction; to be tracked by each jurisdiction. |
| <b>6. Protect Natural Floodplain Functions</b> | 6a – Don't block natural flowways.<br><br>6b – Report blocked ditches, swales and canals.                                                                                                                | R8 – Fewer violations of unpermitted filling or blocking of natural flowways; to be tracked by each jurisdiction<br><br>R9 – Increased requests for action, to be tracked by each jurisdiction                                                                                                                                          |
| <b>7. Prepare for Hurricanes</b>               | 7 – Choose your flood warning system.                                                                                                                                                                    | R10 – Increased sign-up for personal notification, to be tracked by Lee County Emergency Management                                                                                                                                                                                                                                     |

After considering a long list of possible outreach projects, the committee selected these six:

- annual letter to residents in the Repetitive Loss Areas
- annual letter to non-resident home owners in repetitive loss areas
- applicant brochure
- annual event for representatives of all media
- annual Media Hazard Webpage
- annual email or letter to real estate and insurance agents, and lenders

The products themselves will be designed to the requirements of Activity 610 – Flood Warning and Response through the alternative outreach option 611 B (5c).

**Outreach Project 1:** Distribute an annual letter to residents in the Repetitive Loss Areas from the elected official who chairs the jurisdiction’s governing board. This letter will go out in February, the peak of Lee County’s visitor season.

This outreach will deliver these messages:

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5c – Before you remodel, learn about flood regulations and building codes;
- 6b – Report blocked ditches, swales and canals;
- 7 – Choose your flood warning system.

The letter includes how to contact the local communities and directs readers to websites.

**Outreach Project 2:** Distribute an annual letter to non-resident home owners in repetitive loss areas, also from the elected official who chairs the jurisdiction’s governing board and also in February. Insurance and real estate agents and lenders on the committee felt strongly that this is likely to be a different audience from the residents because of the local likelihood that many dwellings are seasonally occupied or are rentals. The alternative message 6a was used here because the non-resident would be more likely to build something to obstruct a flowway than to notice one that is blocked in the neighborhood.

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5c – Before you remodel, learn about flood regulations and building codes;
- 6a – Don’t block natural flowways;
- 7 – Choose your flood warning system.

The letter includes how to contact the local communities and directs readers to websites.

**Outreach Project 3:** Each jurisdiction’s floodplain administrator or CRS coordinator will ensure that all permit applicants are given a **brochure** to encourage them to learn about the safety and insurance benefits of exceeding minimum building standards for new construction and remodeling. This brochure is given regardless of whether the construction project is in or out of the SFHA. The messages are:

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5b – Know the safety and insurance benefits of exceeding minimum standards;
- 6a – Don’t block natural flowways;
- 7 – Choose your flood warning system.

The brochure directs readers to websites.

**Outreach Project 4:** The Lee County PIO will host an **annual event for representatives of all media** – particularly assignment editors and weather reporters. This presents the opportunity for persuasive, two-way communication with decision-making assignment editors as well as reporters. This enables the committee members, floodplain administrators, CRS coordinators and the Lee County PIO to interact with both reporters and assignment editors and respond to their needs. It is designed to push messages that will be useful annually in any storm event. It is important to note that although the media in Lee County saturates the area with storm warning and response information and general safety and preparedness tips, it does not present this information with consistent, action-oriented messages that reflect the NFIP/CRS topics. This event will not simply regurgitate the information in either the Media Hazard Webpage or the Lee County All Hazards Guide.

This will be in May at the outset of the June 1-October 31 hurricane season, which is also the local rainy season. In addition to receiving information, editors and reporters can interview local floodplain managers, emergency response staff and PPI Committee members for stock photos and video to be used not only for hurricane and storm preparedness but also for prestorm coverage.

This will heavily urge the media to either link their web sites to the Lee County EOC and jurisdictional flood home pages or to post the recommended flood hazard links on their own web sites. These messages will be delivered, and they will fulfill the Activity 610 requirements:

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5a – Get a permit before you build;
- 6b – Report blocked ditches, swales and canals;
- 7 – Choose your flood warning system.

**Outreach Project 5:** The Lee County PIO will provide a link to the **annual Media Hazard Webpage** with “ready to use” messages, information and maps (flood and evacuation) for every media outlet as well as individual reporters. During a storm event, this prepared information will make it easy for media to access action-oriented, consistent messages, especially those supporting Activity 610 objectives. In addition to communicating the PPI messages, this outreach will also encourage the media to refer its

audience to the jurisdictions' web sites, to FloodSmart and other important websites, and floodplain management staff for additional information. It will also encourage the media to post or reprint this information to their own websites and their hurricane preparedness guides. The Lee County PIO will update the webpage as needed with input from Lee County Emergency Management staff, floodplain managers and CRS coordinators. This will be done in coordination with May/June hurricane season coverage. The Topics/Messages are:

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 6b – Report blocked ditches, swales and canals;
- 7 – Choose your flood warning system.

**Outreach Project 6:** Floodplain managers or CRS coordinators for each jurisdiction will distribute an annual email or letter to real estate and insurance agents, and lenders in June. In addition to communicating the PPI messages, it will also encourage the agents and lenders to post this information on their websites and pass it along to their clients. The messages will include:

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5c – Before you remodel, learn about flood regulations and building codes;
- 6b – Report blocked ditches, swales and canals;
- 7 – Choose your flood warning system.

## Flood Response Projects

The multijurisdictional PPI develops standards for the Flood Response Preparation (FRP) package that is created annually by the Lee County Emergency Operations Center for distribution by the Lee County Public Information Officer if a flood event occurs. All jurisdictions have input into this package of information. During activation of the Lee County Emergency Operations Center, the Lee County PIO becomes the central spokesperson for the media. Where and when appropriate, however, references to contacts in each of the jurisdictions will be made. This is especially important for post-storm permitting. This information includes messages for broadcast and print media news releases, social media dissemination, and websites.

The chart below lists the messages (labeled as "M") for the flood protection and response communication – and their corresponding CRS topics (CRST). It also lists the outcomes (labeled as "O") expected for these messages.

| Flood Protection Messages                        |                                                                                                       |                                                         |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------|---------------------------------------------------------|
| Timing                                           | Message/CRS Topic                                                                                     | Outcome                                                 |
| As the storm or hurricane approaches (pre-storm) | M1 Obey evacuation notices (CRST 7 Prepare for Hurricanes)                                            | O1 People willingly and quickly evacuate                |
|                                                  | M2 Pack your go-bag and your pet needs. (CRST 4 Protect People.)                                      |                                                         |
|                                                  | M3 Report blocked ditches, swales and canals (CRST 6 Protect Natural Floodplain Functions)            | O2 Flooding is reduced                                  |
| After the storm (post-storm)                     | M4 Do life-saving and damage mitigation immediately (CRST 3 Protect Property) (CRST 4 Protect People) | O3 Injury and more serious property damage is mitigated |
|                                                  | M5 Get a permit for permanent repairs. (CRST 5 Build Responsibly)                                     | O4 New construction meets code                          |

These are the (flood response preparation) projects that will deliver these messages:

**FRP1 – Pre-storm News Releases:** The Lee County Public Information Officer, who is a member of the PPI Committee, will include the M1, M2, M3 messages in all appropriate storm-related news releases.

**FRP2 – Social Media Postings:** The Lee County Public Information Officer, who is a member of the PPI Committee, will ensure that the M1, M2, M3 messages are included in Facebook, Twitter and all other social media communication prior to the storm.

**FRP3 – News Briefings from the EOC:** If the EOC is activated during an event, the Lee County Public Information Officer, who is a member of the PPI Committee, will include the M1, M2 messages in all media briefings.

FRP update: As a result in the media guide to the media webpage in Outreach Project 5, the sample attachment within this FRP has been tweaked. The FRP references a webpage link now.

**FRP4 – Post-storm News Releases:** The Lee County Public Information Officer, who is a member of the PPI Committee, will include the M4, M5 messages in all appropriate storm-related news releases.

**FRP5 – Additional web postings:** The Floodplain Administrators or CRS Coordinators for each jurisdiction will post additional M4, M5 messages on their permitting web pages. This is very important because the permitting offices of the different jurisdictions may alter their routine permitting processes as a result of the storm event. The storm-related permitting information must clarify these alternate guidelines.

These messages will be disseminated for all events in which the Lee County Emergency Operations Center is in pre-activation (during which the event is continually reviewed to determine whether a full activation is required) or in full activation.

| <b>Flood Response Projects Summary</b> |                                          |                |                |                                                                    |                                                                     |

**Messages:**

- 1 – Learn your flood hazard, zone and map information and your evacuation zone;
- 2 – Buy flood insurance for your home and contents;
- 3 – Ask your community floodplain manager about flood protection assistance;
- 4 – Get a print or online copy of the Lee County All Hazards Guide;
- 5a – Get a permit before you build;
- 5b – Know the safety and insurance benefits of exceeding minimum standards;
- 5c – Before you remodel, learn about flood regulations and building codes;
- 6a – Don't block natural flowways;
- 6b – Report blocked ditches, swales and canals;
- 7 – Choose your flood warning system.

## IMPLEMENTATION, MONITORING AND EVALUATION

Floodplain managers and CRS coordinators will document their activities throughout the year. The PPI committee will meet annually no later than August 31 of each year to review those activities, evaluate their success and update the PPI document if necessary through an addendum. Over time, the committee has refined the data collection method to become more simplified.

**Specific tasks of this implementation include:**

|  |                                                                                                                                                                                                                                  |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Floodplain managers and CRS coordinators will view Website content monthly to update content and test link                                                                                                                       |
|  | Floodplain managers and CRS coordinators will update insurance statistics charts each time the NFIP distributes updated, to any member jurisdiction and/or when new CIS (community information system) information is available. |
|  | The Lee County PIO will maintain an updated contact list of local media.                                                                                                                                                         |
|  | Floodplain managers and CRS coordinators (prior to the annual meeting of the PPI Committee) will update their contact lists of licensed real estate and insurance agents and lending institutions.                               |

**Trends:**

|  |                                                                                                                                                                                                                                                                                                                                         |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | Floodplain managers and CRS coordinators will discuss and contribute information/data to a composite annual draft PPI report that is to be presented each calendar year at the annual monitoring meeting to attest to accomplishment of the above tasks and show the tracking of <i>general</i> outcomes including, but not limited to: |
|  | Increase or decrease in Requests for FIRM information from the jurisdictions                                                                                                                                                                                                                                                            |
|  | Increase or decrease in Hits to online zone look-ups and other floodplain management web pages                                                                                                                                                                                                                                          |
|  | Increase or decrease in Number of flood insurance policies in force (through the CIS documentation)                                                                                                                                                                                                                                     |
|  | Increase or decrease in Requests for flood protection information and site visits from the jurisdictions (including a notation of which came from the Repetitive Loss outreach projects)                                                                                                                                                |
|  | Increase or decrease in Number of printed copies distributed & downloads of the All Hazards Guide                                                                                                                                                                                                                                       |
|  | Increase or decrease in violations for unpermitted or non-compliant construction                                                                                                                                                                                                                                                        |
|  | Increase or decrease in Construction projects that exceed minimum standards                                                                                                                                                                                                                                                             |
|  | Increase or decrease in Violations of dumping/obstructing flows in creek, canals, ditches and streams                                                                                                                                                                                                                                   |
|  | Increase or decrease in Reports of blocked ditches, swales and canals                                                                                                                                                                                                                                                                   |

**FRP:**

|  |                                                                                                                                                                                                                                        |
|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | In years when there is a storm event, these items below will also be tracked as outcomes of the Flood Response Projects (FRP). This is especially important because we haven't had enough local flooding to establish a good baseline. |
|  | Statistics on evacuation, including occupancy of shelters and traffic counts on major highways – if available                                                                                                                          |
|  | Activation of Lee County and Cape Coral EOC                                                                                                                                                                                            |
|  | General information on the extent of flooding                                                                                                                                                                                          |
|  | General information on injuries and property damage                                                                                                                                                                                    |
|  | Statistics on flood-related construction and violations for unpermitted work                                                                                                                                                           |

After the PPI committee meets to review the year's outreach programs and the results of outcome monitoring, the annual evaluation report will be finalized and sent to the governing board of each jurisdiction.

## Appendix A PPI Committee Meeting Notes (establishing the PPI)

Where the evaluation shows revisions would be productive, such as dropping a project that is not having an effect on the desired outcomes, the committee may vote to adjust the projects accordingly and release an addendum to the PPI if necessary.

June 3, 2014 – Organizational meeting, attendance included:

- Bonita Springs: John Gucciardo, Assistant City Manager, and Bob Rosier, Rosier Insurance;
- Cape Coral: Rick Sosnowski, Principal Planner, and Mary Briggs, Lee Memorial Hospital Communications Manager;
- Fort Myers: Brent Brewster, Floodplain Administrator, and Danielle St. Onge, Realtors Association of Greater Fort Myers and The Beach;
- Fort Myers Beach: Josh Overmyer, Floodplain Administrator;
- Lee County: Robert Stewart, Floodplain Administrator, and Robbie Roepstorff, Edison National Bank;
- Sanibel: Laura Wesserling, Deputy Building Official, and Chris Heidrick, Heidrick and Company Insurance.

July 23, 2015 – Discussion of messages, audiences, and potential projects; attendance included:

- Bonita Springs: John Gucciardo, Assistant City Manager, and Bob Rosier, Rosier Insurance;
- Cape Coral: Wyatt Daltry, Principal Planner, and Mary Briggs, Lee Memorial Hospital Communications Manager;
- Fort Myers: Brent Brewster, Floodplain Administrator, and Danielle St. Onge, Realtors Association of Greater Fort Myers and The Beach;
- Fort Myers Beach: Megan Will, Floodplain Administrator, and Dave Anderson, Fort Myers Beach Chamber of Commerce;
- Lee County: Tim Engstrom, Lee County assistant PIO; and Robbie Roepstorff, Edison National Bank; Billie Jacoby, Lee County CRS Coordinator;
- Sanibel: William Dalton, Emergency Management Director, and Chris Heidrick, Heidrick and Company Insurance;
- Also in attendance: Joan LaGuardia, Lee County Administration.

Sept. 15, 2015 – Refinement of messages and projects; discussion of templates; attendance included:

- Bonita Springs: John Gucciardo, Assistant City Manager, and Bob Rosier, Rosier Insurance;
- Cape Coral: Wyatt Daltry, Principal Planner;
- Estero: Marilyn Edwards, resident;
- Fort Myers: Danielle St. Onge, Realtors Association of Greater Fort Myers and The Beach;
- Fort Myers Beach: Megan Will, Floodplain Administrator;
- Lee County: Betsy Clayton, Lee Co. PIO; Billie Jacoby, Lee Co. CRS Coordinator; Josh Overmyer, resident;
- Sanibel: Laura Wesserling, Deputy Building Official, and Chris Heidrick, Heidrick and Company Insurance.
- Also in attendance: Joan LaGuardia, Lee County Administration.

Oct. 13, 2015 – Discussion of writing the PPI and designing the projects as alternative outreach options 611 B (5c) for Activity 610 and 362 A (4C) and 362 B (3) for this Activity 360; final agreement of the projects, outcomes and overall approach of the document; attendance included:

- Bonita Springs: Bob Rosier, Rosier Insurance;
- Cape Coral: Wyatt Daltry, Principal Planner;
- Estero: Marilyn Edwards, resident;
- Fort Myers: Danielle St. Onge, Realtors Association of Greater Fort Myers and The Beach;
- Fort Myers Beach: Megan Will, Floodplain Administrator; Dave Anderson, Fort Myers Beach Chamber of Commerce;

## Appendix B At-a-Glance CRS Summary

- Lee County: Betsy Clayton, Lee County PIO; Billie Jacoby, Lee County CRS Coordinator; Robbie Roepstorff, Edison National Bank;
- Sanibel: Sandy Larsen, Assistant City Engineer; Chris Heidrick, Heidrick and Company Insurance;
- Also in attendance: Joan LaGuardia, Lee County Administration.

| Project | Audience                                                     | Message               | Result/Outcome                  | Schedule   | Responsibility                                              |
|---------|--------------------------------------------------------------|-----------------------|---------------------------------|------------|-------------------------------------------------------------|
| OP 1    | Residents in repetitive loss areas                           | 1, 2, 3, 4, 5c, 6b, 7 | R1, R2, R3, R4, R5, R6, R9, R10 | February   | Floodplain manager or CRS coordinator for each jurisdiction |
| OP2     | Non-resident owners of property in the repetitive loss areas | 1, 2, 3, 4, 5c, 6a, 7 | R1, R2, R3, R4, R5, R6, R8, R10 | February   | Floodplain manager or CRS coordinator for each jurisdiction |
| OP3     | Permit applicants                                            | 1, 2, 4, 5b, 6a, 7    | R1, R2, R5, R7, R8, R10         | Year-round | Floodplain manager or CRS coordinator for each jurisdiction |
| OP4     | Media                                                        | 1, 2, 3, 4, 5a, 6b, 7 | R1, R2, R3, R4, R5, R6, R9, R10 | May        | Lee County PIO                                              |
| OP5     | Media                                                        | 1, 2, 3, 4, 6b, 7     | R1, R2, R4, R5, R9, R10         | May        | Lee County PIO                                              |
| OP6     | Real estate and insurance agents and lenders                 | 1, 2, 3, 4, 5c, 6b, 7 | R1, R2, R3, R4, R5, R6, R9, R10 | June       | Floodplain manager or CRS coordinator for each jurisdiction |
