LANI KAI SIGNS

RECEIVED BY

The following is an attempt to explain exactly what signs the Lani Kai had and what the Lani Kai would like to replace them with. There were four (4) Monument Signs that were removed and a substantial amount of painted signs on the building itself were also removed. The following is a list of what was there and what the Lani Kai would like to replace them with:

- The First Sign is located at 1400 Estero on the North End of the property. **(Pictures of the old sign have been marked *Exhibit "1"*)** the applicant is requesting replacement of previous sign; 11'-7" by 8' 2" (Exhibit E). Applicant will use the existing base: Reason for Height adjust is because the North Side of the sign is obstructed by an FPC Electrical Box and water pipes. Also when cars park on either side of the sign you cannot see the sign. Requesting a variance on the set back to 1.5 feet from right of way. The applicant intends to use the existing base. *(A copy of the proposed new sign is marked Exhibit "2")*
- The Second Sign is located on the South Side of 1400 Estero Blvd although the South Side does not have the electric box or water pipes, but cars parking on either side of the sign obstruct the sign, so the applicant is requesting the same size and type of sign on the South end of the parking, as well as a 1.5 foot setback, utilizing the existing monument base. *(A copy of the old sign is marked "Exhibit 3"). (A copy of the new sign has been marked "Exhibit 4")*

THIRD SIGN

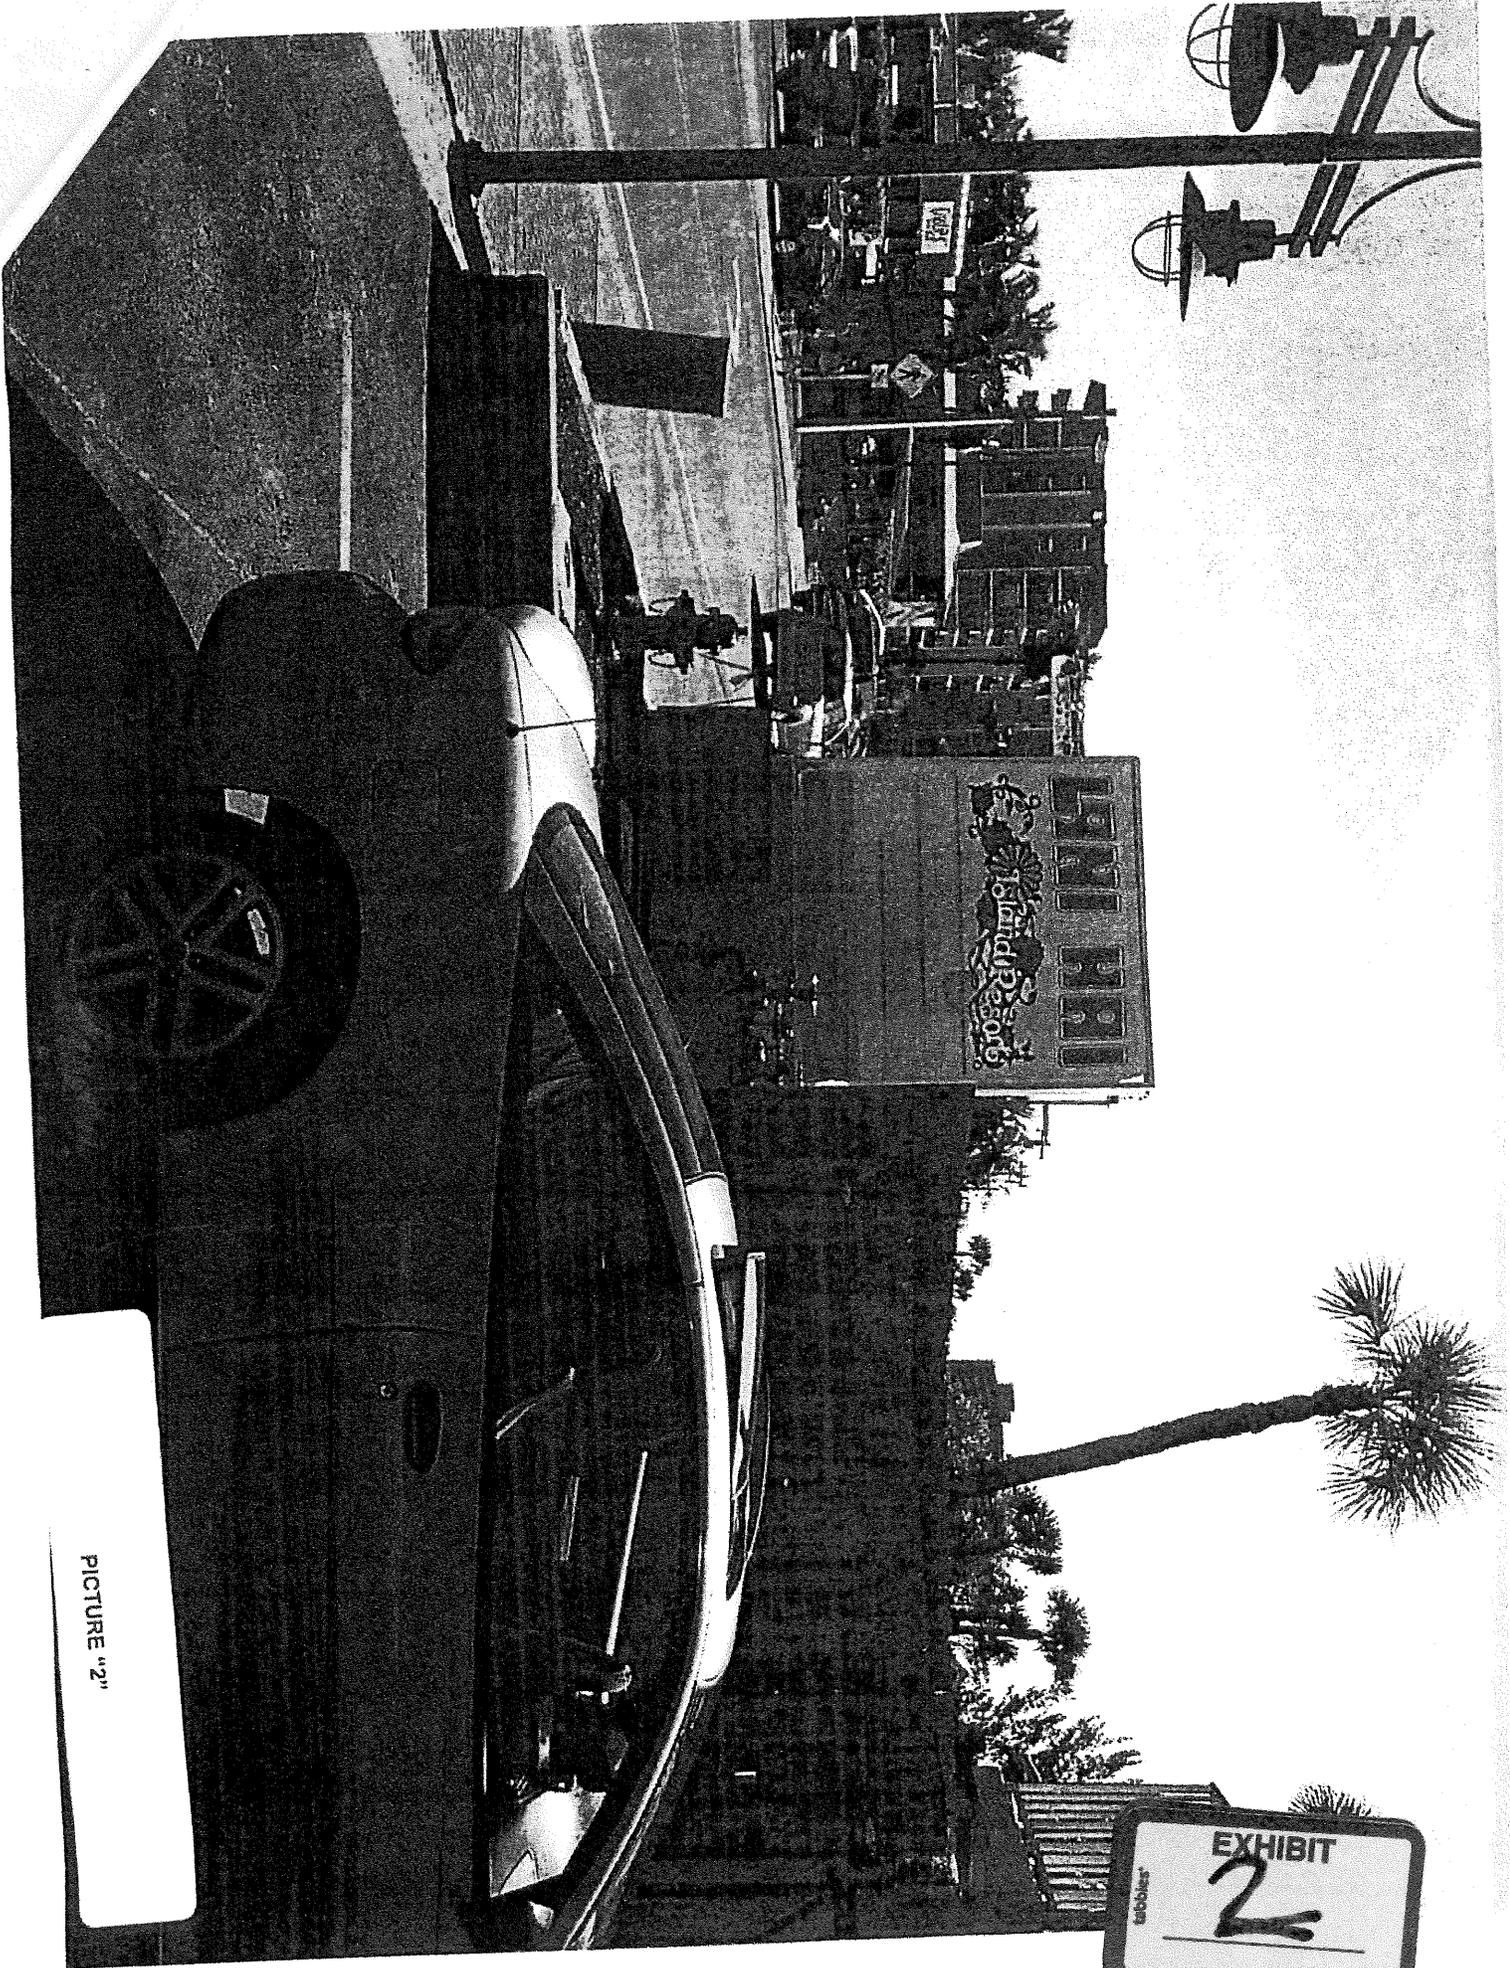

- The Third Sign is located at 1479 Estero Blvd; originally the applicant had a “V” shaped sign here (*A picture of the old sign has been marked “Exhibit 5”*)(*A copy of the new sign has been marked “Exhibit 6”*) the applicant removed the sign but not the base because of parking, the applicant is requesting that he be allowed to use old cement base and construct a new V –sign similar to what he had before (3 foot base 4’ foot sign on top of that), which is internally illuminated aluminum and metal with acrylic faces.

In the alternative applicant request replacing with a 3 base and 4 foot sign, a viewable from both sides two sided internally illuminated, aluminum and metal with acrylic faces to be located at the same spot.

FOURTH SIGN

- The Fourth Sign is located at 1331 Estero Blvd, the old sign was in the middle of the parking lot (**A picture of the sign has been marked “Exhibit 7”**) this sign was evaluated to be scene over parked vehicles. The old pole sign was approximately 30’ feet in the air. Applicant request a new sign with a base height of six feet and a four foot by eight foot sign on top of that. (*A picture of the proposed new sign has been marked “ Exhibit 8” attached*) All signs are internally illuminated aluminum and metal signs with acrylic faces, and black out letters

I hope this provides a meaningful summary of what the applicant is requesting.
